

Recycle

What is Recycling?

Recycling means making rubbish into something new. Every time you throw something away it gets sent to landfills. More and more rubbish is piled on top until it is too big and the landfill has to be closed. The great thing is that most things can be recycled!

Why Recycle?

Recycling is a way of extending the usefulness of something that we've already used. Every time we recycle, we save our environment a little more. This means cutting fewer trees, using less water and less energy. By keeping rubbish away from landfills and recycling what we can, we help to protect our environment.

Discussion

Why not start a discussion with your parents or class and ask yourself; do I recycle? Could I recycle more? What happens to the things we don't recycle?
